This is a courtesy notification that as per responsible disclosure guidelines, I will be publicly disclosing full details of all vulnerabilities I found on your site if I do not receive a response from your security team within one week. This is to protect your customers from theft of user funds because of your website's security weaknesses, and your team's lack of responsiveness is posing a danger to your users.

Based on the info I pulled for these proofs of concept, I saved the user "Nekoglailox" alone from a potential loss of over a half a million US dollars :) Proper execution of these attacks would lead to an immediate theft of seven figures worth (or more) of cryptocurrency from bc.game and its users.

When I find more weaknesses, I will send an updated report. There are a few other promising vectors I am currently exploring.

My Telegram username is @keewenaw .

Thanks and please let me know if you require more information.

Hi,

We really appreciate the effort in finding vulnerabilities on our site.

Kindly consolidate your finding into a report document (word or pdf), alongside sharing any relatable files.

If you could provide more detailed solutions, kindly include them in the file.

Could you also provide your registered email address, username, and telegram ID?

Thank you.
